Platform	Distribution	Architecture
Linux	Ubuntu 18.04	ARM (for NVIDIA® Jetson™)

Pre-load Allxon DMS Agent Installer

1 To pre-load Allxon DMS Agent Installer on NVIDIA® Jetson™ systems, please type in the following command in Terminal. By entering the command, the pre-loading process of Allxon DMS Agent Installer will start automatically.

Note

- Please make sure the command above is **NOT** executed under “administrative privileges” (e.g. superuser). It has to be run under “Normal User privileges”.
- Please input the command **without** newlines.

Command

```
nvidia@jetson-ubuntu:~$
```

```
wget -qO - "https://get.allxon.net/linux/trial/" | bash -s  
-- -m "<company name>" -i "v2" "NVIDIA" --plugin  
"462fad46-9603-4dd2-8a0b-2209ca50a2b2"
```

For example

```
nvidia@jetson-ubuntu:~$
```

```
wget -qO - "https://get.allxon.net/linux/trial/" | bash  
-s -- -m "Allxon" -i "v2" "NVIDIA" --plugin "462fad46-  
9603-4dd2-8a0b-2209ca50a2b2"
```

2.

Check Pre-load Status of Allxon DMS Agent Installer

Upon successful process, Allxon DMS Agent Installer should be created on the desktop, with the file name "**Allxon DMS**".
